Lab #5 - Assessment Worksheet

Penetration Testing a pfSense Firewall

Course Name and Number:

ITN263

Student Name:

Afeefah Manzoor

Instructor Name:

Prof Razaq

Lab Due Date:

_____

Lab Assessment Questions

1. What does an effective penetration test consist of?

   post-attack activies
   enumeration
   exploitation
   reconassance
   scanning

2. Which is *not* part of the attacker kill chain?

   a) Reconnaissance
   b) Exploitation
   c) Weaponization
   d) System hardening

   D)

3. Time and dollar budgets permitting, it is beneficial to run more than one vulnerability scan because different vulnerability scanners may get different results.

   True or False?

   true

4. It is important to re-run a vulnerability scan after patching programs or closing vulnerabilities.

   True or False?

   true

5. Domain Name Service runs on port __53_____.

6. Explain the difference between LAN and WAN firewall rules.

   all LAN users are allowed on the WAN and have no restrictions to it and LAN is a local network like for a specific house and WAN is a wide area network for like a large city.
